

THE WORLD OVER

MACKLIN RESIGNS AS PRESIDENT

LARGE ATTENDANCE, STAMPEDE

HAIL AND RAIN, SASKATCHEWAN

GERMANY'S PLANS REVEALED

PEACE WATERS AGAIN MENACE

WINNIPEG—B. T. Macklin, newspaper pioneer of the west, has retired as president of the Winnipeg Free Press, the paper he joined 35 years ago.

J. W. Dufon, editor-in-chief, was appointed president and Victor Sifton, vice-president and general manager.

Attended by 32,358 people, largest summer since 1930, Calgary's 1931 Exhibition and Stampede ended on Monday afternoon as official reports freely predicted might be a record year for the famous event. Opening day attendance exceeded that of 1931 by 887 and was higher than either 1931, 1932 or 1933 by 100,000. Total first day attendance for the entire week was 12,556, 26,600 and 27,474 respectively.

WINNIPEG—Farmers in Saskatchewan on Monday counted their losses from week-end hail damage in thousands of dollars. Prolonged week-end rains were reported in the Vincent, Plunkett and Gurney districts. Rail service was disrupted in the western section of Saskatchewan and at Regina a freight train was marooned, the tracks being washed out in front and behind it.

BERLIN—Germany will build 48 ships planned 107,500 tons this year. It was officially announced on Monday. Shipbuilding is expected to be 25,000-ton battleships, carrying 25-centimeter 11-inch guns; two 10,000-ton cruisers mounting six-inch guns; 14 destroyers of 1,825 tons, some of which are already under construction, mounting 4.7 inch and 2.15 inch guns; 25 submarines of 250 tons, the first of which joined the fleet on June 25, while two others are undergoing their final fitting-out; the 500-ton submarines and two 700-ton submarines.

EDMONTON—Aggravated by 48 hours rain rainfall which gives no sign of let-up, swollen rivers of the Peace River country are again rising with threats of still greater flood damage. Much temporary repair work to the roads and bridges, rushing during the past few days when floods had somewhat subsided, is rapidly being destroyed. Railway crews striving to renew service over the Smoky River are seriously hampered as are road crews working to establish highway service from Grande Prairie via Spirit River. Peace River, roads are impassable and in the absence of train service this is seriously hampering efforts to replenish supplies that are running low in certain lines.

Lake waters at Slave Lake town have risen two inches and are still rising. People have vacated the town and are living in tents on higher land.

The good old days were those when grandma used to give the chickens the stuff our wives make into salads.

WHEAT SHOOTS UP WITH WARM WEATHER HERE

CROPS MAKING RAPID GROWTH; SOME WHEAT IN SHOT BLADE

Wheat crops in the district have made rapid growth since the advent of warm showery weather, and within about two weeks later than normal years, some large yields of grain this fall are now expected.

During the months of May and June rain fell almost every other day, while the last couple of weeks have been quite warm with considerable rain at times. Wheat is now showing a good stand and many fields are in the shot blade, with ample moisture to carry the grain into the heads.

Grasshoppers have been reported to be plentiful throughout some parts of the district, but rains have held them back considerably, and with bait mixing station in full operation farmers report good success with the poison campaign and it is expected that there will be little damage from the pest this season.

Crops throughout the district have also shown rapid growth with the warmer weather and in most cases potatoes and other vegetables are as far advanced now as in former years. With the plentiful supply of moisture at hand gardeners are hopeful of a record harvest this fall.

JUNIOR TENNIS PLAYERS PERFORM AT TROCHU

The Juniors at the Carbon Lawn Tennis Club visited Trochu on June 25th to play a match with the Trochu Juniors. Five matches were scheduled, but owing to rain only three were played, resulting in a win for Carbon by two events to one.

The following are the results and scores:

Boy's Singles—C. Hilt, Trochu, defeated H. Wink, Carbon, 6-3.

Girl's Singles—Miss A. Lemay, Carbon, defeated Miss H. Masterson, of Trochu, 6-2.

Boy's Doubles—H. Wink and R. L. Wink, Carbon, defeated L. Slipp and W. Kitz, Trochu, 6-2.

Girl's Doubles—Misses A. Lemay and M. McGuire, Carbon, versus Misses H. Masterson and K. Slipp, Trochu, not played.

Mixed Doubles—H. Wink and Miss A. McGuire, Carbon, versus C. Hilt and Miss K. Slipp, Trochu, not played.

A professor declares that married men are smarter than single ones. But then they have to be.

Mr. H. H. Stevens Launches A New Party at Toronto

Ottawa—Hon. H. H. Stevens announced on Sunday night that he had accepted the leadership of a new political party. The party would have for its object a "reconstruction and reform program" similar to that which he had been advocating for the past 18 months, the former minister of trade and commerce stated. The name and platform of the new party will be announced within a week's time.

The new party will be "in the fight very soon" and anticipated putting up candidates in all constituencies in the near general election. He would make a trans-Canada speaking tour as soon as the campaign was launched. The announcement of the former minister was made at a press conference. Headquarters of the new organization will be in Ottawa.

Associated with Mr. Stevens in his new party are: Mr. Warren Cook, Toronto, president of the Farmers' Manufacturers' Association, Mr. Thomas D. Lison, Hamilton, well known in the publishing business, and Mr. Tom V. Bell, Montreal, head of a printing and binding business.

Thumb Sketch of MR. H. H. STEVENS Who has announced that he will lead a new party at the forthcoming election.

Letters to the Editor

Editor, The Chronicle

Dear Sir:

Allow me space in your paper for a few lines in answer to Mr. Thorburn's letter.

I assure Mrs. Thorburn that this is not a conglomeration of words as suggested by Mr. Douglas of Social Credit fame, but such that may be read.

In her quiet times surely she must see that machinery is taking the place of labor. For instance, the manufacturers of boots once employed thousands, and now about 100.

Today the machine has displaced labor and so, in every business, in fact we are living in a machine age.

Mrs. Thorburn is very sensible of the farmers' welfare, and the price of wheat. Again, machinery displaces labor, and so in the case of the farmer, more numbers move to the ranks of the unemployed. We all know that the price charged for farm implements is out of all proportion to the price obtained for the production of wheat.

The farmers are handicapped and do not get the price of production. The price of machinery must be lowered or a levy will have to be made on the machines to help support the unemployed. This is where the Just Price comes in, and of fruitum on all machinery.

Second money really amounts to small change—just enough to give change in business, as 5 per cent of business is done through credit.

What system would Mrs. Thorburn suggest to look after the vast army of unemployed? They have to be fed, clothed and sheltered. Machinery will create unemployment as the years go on.

In a few short years Social Credit will be a well established working principle. Not only will the unemployable certificate or basic dividend be given, but the Just Price will reach far more than that figure.

It is a well known fact that the present financial system has failed. It will soon be a thing of the past when the great money interests will be governments and municipalities money is to reach a few to the detriment of many.

PRO BONO PUBLICO

Editor, Carbon Chronicle

Dear Sir:

As one plain person to the other and in very plain English I will try to point out to Mrs. Thorburn a few facts, on which she is quite misinformed, to say the least.

In her first question for me she put it argument) she speaks that Albrecht requires good federal dollars to back non-negotiable certificates, completely losing sight of what is behind these good federal dollars. As the federal government has transferred natural resources to the provinces the only thing behind federal dollars is ability of Canadian people to pay (in goods or services). Her second argument about the farmer is also quite true (my brings home the bacon quite true my

lady), but when I watch your sixty cents a bushel wheat going from hand to hand and finally reaching the consumer in fifty-cent loaf, consumer is the one who pays for bacon, which the farmer never gets. Here is my little question: "Where does the difference, or \$4.60, come from, and by thunder, where does it go to?"

As about Mr. Albrecht being a poor ignorant man and Mrs. Thorburn ever vice, we hold the opposite opinion.

Now according to the Canadian Year book of 1932 (authenticity of Mrs. Thorburn) only fifty-five millions worth of goods were manufactured in Alberta, but by the time consumers got them they sold about two hundred and seventy-five millions, and there is the hundredth harvest where Albrecht will reap his profits in handling, about having one hundred and twenty millions to do the work of 120 millions.

The forego that only 150 millions of currency in Canada, does the business of billions of dollars every year. As about taking Albrecht's proposals to seriously I will defy Mrs. Thorburn to seriously point out a platform of any party which will offer one-tenth as much in the way of solving present problems as Social Credit, and those who laugh last laugh the best.

PAUL W. SCHOPPEE

Secretary Carbon Group Social Credit

BANK MONTREAL WEEKLY CROP REPORT

General—Rainfall over the prairie provinces has been less general during the past week and the lack of moisture is causing some anxiety in southwestern Saskatchewan and southern Alberta. Otherwise crop conditions generally are favourable. Higher temperatures have permitted more rapid growth in the southern area where 40 per cent of the wheat is in sheath. Grasshoppers are fairly numerous in some districts but there has been no serious damage from any source to date. In the northern area crops are looking good. In the south, where the weather of the past few days has been so favourable, in good condition. In Ontario crops continue to show satisfactory growth, and present prospects are for heavy yields in the Maritime provinces owing on the whole promise well but dry weather is needed to stimulate the growth. In British Columbia growing conditions generally are satisfactory on the mainland, but are not so favorable on Vancouver Island owing to the lack of moisture in May.

Details of Prairie Crops

Alberta—Crops are still backward from any source to date. In the north, more progressing favourably. In the southern area crops are looking good. In the south, where the weather of the past few days has been so favourable, in good condition. In Ontario crops continue to show satisfactory growth, and present prospects are for heavy yields in the Maritime provinces owing on the whole promise well but dry weather is needed to stimulate the growth. In British Columbia growing conditions generally are satisfactory on the mainland, but are not so favorable on Vancouver Island owing to the lack of moisture in May.

CLEAN-UP DAY AT CEMETERY ON WEDNESDAY, JULY 24

Wednesday, July 24th, in the afternoon, has been chosen by the ladies of Carbon and surrounding district as clean-up day at the local cemetery, and every person who is able to be there, is requested to help with this work. There will be considerable trimming and cleaning to do, so bring along your garden tools and hedge clippers.

Hesketh Sports Day July 17th

A mammoth sports day is planned by Hesketh boosters for Wednesday, July 17th and posters are now out announcing the affair.

Commencing in the morning at 10.30 o'clock the program has been outlined to give its attendees a full day's enjoyment in various softball tournaments and other events.

In the evening a big dance will be held in the Hesketh Community hall and Joe Byrne and his White T-shirts have been engaged to furnish appropriate music.

During the day refreshment booths and other attractions will be operated, and visitors who do not wish to make up a trunk basket will be able to purchase their lunch on the grounds.

The committee in charge have planned a full day of sport for young and old and you are invited to be present.

NEW SERVICE STATION

The Texaco Petroleum Company of Canada is opening up a new service station in Carbon, Alberta, and has made arrangements to take over the old Imperial Lubricant office from J. H. Oil.

S. N. Wright, well known farmer and Reeve of the Municipality of Carbon for the past 15 years, will be in charge of the new business, which will be opened as soon as the building is ready.

Stevens Ties and Jim Ramsay and the new operators are now working on the remodeling of the building, which has been moved back about 40 feet to its new site for a runway for cars on both the south and east.

VALUABLE CANADIAN FARM LAND

The average value per acre of occupied farm lands in the various provinces of Canada in 1931, including improved and unimproved land, together with dwelling houses, barns and other farm buildings, is reported as follows: New Brunswick, \$27; Nova Scotia, \$27; Prince Edward Island, \$27; Quebec, \$41; Ontario, \$41; Manitoba, \$37; Saskatchewan, \$16; Alberta, \$16; and British Columbia, \$16.

It might be disconcerting to some radio operators if they could see the number of disks that are turned when they begin.

In good condition and show strong, even growth. Wheat is a good stand but only a few early fields are in the sheath. Prospects generally are satisfactory although more rain is required in the southern and western areas where the moisture reserves are small.

Manitoba—Crop prospects both in respect to wheat and coarse grains continue favourable, with ample moisture for the present. Having has commenced in some districts with a good crop in prospect. Recent rainfall in the western and northern areas has been of beneficial proportions and has resulted in some damage to crops.

Most common thunder is accompanied by very little lightning.

Word was received in Carbon this week that H. B. Davidson's car was involved in the fifth near Lacombe, on Monday, July 1st, while they were on their way to Edmonton.

The accident happened about a mile from Lacombe. Mrs. Davidson was driving at a speed of between 20 and 35 miles an hour when the car, tire she out, throwing the car in the ditch, where it remained.

Besides Mr. and Mrs. Davidson, other passengers in the car were Miss D. Davidson, Mr. Alex. Johnson, Porterville, and a young man, who was seriously injured, and little damage was done to the car, and the party proceeded on its way to the north city.

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Blanca in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1 1/2 cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved. If container is not filled to the top, it will be too hot to drink. The cold water otherwise liquid will become cloudy. Serve with chilled ice.

Protect Wild Life

This is an age of organization. Men and women, boys and girls, band themselves together in clubs, associations, unions, large or small, some of which are isolated groups, others as branches of a Provincial, Dominion, or international body. There are clubs to promote almost every conceivable thing or object, in which mankind can possibly be interested. Their number is legion, and new organizations spring into existence almost every week.

Many organizations have been in existence for a long time, have large memberships, and are still active. They have long occupied a useful and honorable place in our democracy, command the respect of all, and have made worthwhile contributions to society as a whole. Members of such bodies are banded together, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when those conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress; others leaving little but a trail of disillusionment and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to direct attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada ought to take a very keen and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently now singling out one specific organization for a word of commendation we are making no new departure.

The organization now referred to, possibly we should refer to it in the plural and say organizations are the Fish and Game Clubs or leagues of the various provinces. These organizations are province-wide, not confined to sportmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera, or the noblest of the scientist, for, in the final analysis, the interests of these are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the assistance of the human element, where necessary, in order that the happiness which comes from plenty can continue to exist; to secure the passage of the necessary laws by the legislature; to endeavor to maintain the necessary surface water supply, natural cover, trees and food conducive to a bountiful supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are likewise promoting the welfare of all, irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculturists and livestock men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close home to them. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors nicely balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and enormous loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to her, if we are to survive and prosper.

Apart, therefore, from the attractiveness which an abundance and great variety of wild animal, bird and fish life gives to any country, the conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the productivity of the land rests, for without water and natural shelter the land would have a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, for the sake of the country itself, therein, at least by extending their sympathy, support, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

Must Import Grain

Manchuria Will Require Extra Supplies To Feed Population

For the first time in many years, Manchuria, with its great population, must import grain in order to keep its own 30,000,000 people fed.

Because of lack of rain, it is feared that this year's crops of wheat and other grains will be a failure, except in favored districts and already the government of Manchuria has begun to make arrangements to import 50,000 tons of rice from Saigon, Rangoon and Bangkok. Additional large purchases are expected.

The people of Manchuria are not rice eaters, like the Chinese farther south. They subsist on wheat, corn, mostly millet and kaoliang, a species of maize.

Shorter Men For Army

British Regulations Fix Minimum Height For Infantry At Five Feet

Post, Two Inches—The British army is to be shorter. Recruiting regulations issued recently fix the minimum height for infantry at five feet two inches. This is a new record.

Cavalry of the line, tank corps, Royal Engineers, army ordinance and other arms will accept recruits one inch below the minimum previously stipulated, provided they are otherwise fit.

The age of entry is determined, in view of the death of recruits, to bring the army up to full establishment.

The larger a bird happens to be, the longer its life span.

Latest Method Detects

Fingerprints On Cloth

Will Preserve Them Indefinitely After They Are Found

A new technique capable of developing fingerprints left on cloth—much as a snapshot negative is developed—has been added to the New York police department's bag of tricks.

The method, an indirect product of the Hauptmann case, includes the important accomplishment of preserving the original prints in their original condition, while the prints are found. Chemical baths bring out the prints.

Shortly after Lindbergh baby was kidnapped, Dr. Erasmus M. Hudson, a specialist in body chemistry who makes fingerprints a hobby, was called to Hopewell, N.J., to examine the ladder used in the crime.

Using an iodine gas process, he found 500 prints where police had found none with the old powder-dusting method. Incidentally, none of the prints was identical.

Dr. Hudson was invited to direct the New York police department's crime-fighting research in this field. The successful use of silver nitrate solutions on bleached linen and other cloths of light shade, and calcium sulphide on darker fabrics, forced the treatment brings chemical transformation of body salts in the wax of which fingerprints are made.

The treatment brings chemical transformation of body salts in the wax of which fingerprints are made, causing the tiny lines to become apparent to the eye. The prints may be several years old.

The new technique is superior to the currently widespread method of dusting suspected surfaces with colored powder, it was said, because the powder-dusting is effective only when the wax is fresh.

Strange Inventions

Weird Array Of Gadgets At Chicago Congress

Termed by their own president as "the" gadget show of the 14th annual national inventors congress brought to Chicago a strange array of gadgets, gadgets, gadgets and gadgets.

Among things which attracted spectators who viewed the exhibits of 700 inventors and 3,000 manufacturers and distributors were "ultrabassinet," a pneumatic ladder, and a "harm" suit which separates layers from linen.

If hiddy lays an egg she automatically releases a latch which allows her to stroll out into the yard where the layers frolic. No eggs? The only door open to hiddy in the outfit which permits her to hide in the other yard which big, bad men come to gather chickens for market.

"Many inventors are nuts, as I am," said Albert G. Burns, of Oakland, Cal., president of the congress. "But don't forget it's the nuts who generate ideas which develop into inventions."

In the home life sector also was the "ultrabassinet" which, at the turn of an electric switch, provides remote control rocking for baby.

Grading Garnet Wheat

To Indemnify Grain Elevators For Loss Sustained

An appropriate switch, provides remote control rocking for baby. The loss in grading is to come into force on August 1, 1935, and the regulation was effected in an amendment to the Canada Grain Act passed last year.

Supplementary estimates amounting to \$18,362,978 were introduced by Finance Minister R. N. Rhodes. Outside of additional appropriations for the purpose, the government is expected to pay the cost of the grading of the largest variety is national deficiency, for which more than \$3,000,000 is asked.

Battles With Reptile

Noted Traveller Fixes Specimen Of King Cobra

Lawrence T. Griswold, noted anthropologist who has headed a number of expeditions to the Smithsonian Institution and National Zoological Park of Washington, D.C., arrived at Victoria recently with a fine specimen of the king cobra, he said, nearly took his life.

One night in the Philippine Islands Griswold awakened suddenly to find the giant cobra ready to strike. He diverted its attention by throwing a blanket and then with other members of the party killed it. The reptile measured better than 10 feet in length.

Cummings museum, London, contains an elaborate display of victims of snakes collected from Londoners in the last few years. 210

Airport Now Obsolete

Thousands Of Dollars Being Spent On Alterations At Croydon

Improvements and extensive costing thousands of dollars are being made to Croydon Aerodrome to cope with the growth in air traffic.

When Croydon was equipped as a main airport at a cost of \$1,500,000 in 1928, it was considered adequate for London's air services for many years to come.

Since then passenger and goods traffic has increased by over 300 per cent, and air lines radiate to all parts of Europe, the Empire and South America.

Seven years later the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Heath airports.

The lay-out of the buildings is to be altered and extended to speed up the processing of baggage and passports. Passengers who have flown from Paris in one or a half hours are sometimes held up for 20 minutes for this inspection.

When the alterations are completed in two months passports will be inspected in the baggage as it is unloaded from the airlines.

Methods of simplifying the loading and unloading of baggage to and from motor coaches will be used.

An Interesting Exhibit

Development Of Transportation Shown In Many Working Models

From a chariot of ancient Rome, the development, up to the present day, of transportation on land, on sea and in the air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showing the growth of all means of transportation from the crude vehicle of long-ago to the vastly improved and more beautiful machines of to-day.

A feature of the indoor exhibit was a miniature display of Saint John river and part of the harbor with tiny ships, sailing vessels, and a group of 14 pictures of sailing vessels famous in the early days of the century.

The Union station the latest steam-locomotives were on exhibition in their "Sunday best," while at Saint John airport a fleet of Canada's speediest and most up-to-date aeroplanes was shown.

South Pole Tourist Trade

May Be Winter Sports Playground For Australians In Future

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports playground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier 2,400 miles. The imagination of the tourist on the development of safe long-distance air travel, see the tourist of the coming day indulging in snow sports under the shadow of the volcanoes of Erebus and Terror hunting seal, catching penguins, gull, kayaking among the bergs and making short morning sled trips "into the blue."

Sir Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of Antarctica, including possibilities of initiating a seal fur trade, earning of penguin eggs and the opening of a winter sports ground.

Glider Picked Up Wireless

Wireless messages were received in a glider over Dunstable in last week for the first time in England. Mr. G. C. Collins, who holds the British distance gliding record, made the experiment, and he said afterwards that it was highly satisfactory.

"Solomon," said Mr. Isaac to his son, "I have decided to insure your life."

Solomon looked up pitifully. "Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

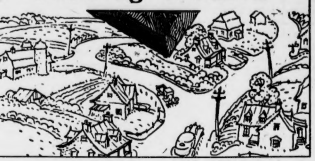

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

"Fadder," he said, "vy must I burn."

Wants Damages

Moore Sues Ontario Automobile and Owner Wants Ontario Government To Pay

Last fall a bull moose ran into his automobile and went off with the radiator shell and a headlight rim, and now Amey Gravelle, of Nainburg, wants the Ontario government to pay for it. He has made formal claim to the department of game and fisheries.

Gravelle said he and a companion were driving a car filled with blankets into a new lumber camp in the Glendora Crown game reserve, north of Saint John, Marie, Ont.

A turn in the road brought them face to face with the bull moose. As the car went forward the moose attacked. The first smash sent the license plate into the bush. The second swipe took off the radiator shell and half a fender. Gravelle and his companion were frantic as they tried to hold their seats in the car.

Will Is Ready Read

Has Claimed Public Attention Since Probation In 1913

There are doubtless other testaments in the vaults of the Registrar's Office, London, but none which so periodically attract public attention as that of Henry Collier, probated in 1973, which must be read at Wren Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petitions for reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

The new camera, designed to take panoramic views from the air, is equipped with eight lenses whose combined range embraces the entire terrain at all points of the compass. At an altitude of 15,000 feet it is possible to photograph an area of 20 square miles, the manufacturers claimed.

Named By Roosevelt

It was President Roosevelt who first designated it as the White House on his official stationery. It is called by that name by every State had an executive mansion (by which term the White House has been previously known) and that the President's home should bear a more distinctive name.

Used For Centuries

The Mohammedan lunar year of 354 days is a creation which corresponds to nothing in nature, says an Egyptianologist, yet this lunar calendar system has been used for 1,813 years—or, as a Mohammedan would count it, 1,354 years.

Work Is Recognized

Two Westerners Honored At Meeting Of Canadian Seed Growers' Association

As recognition of their outstanding work as seed producers, R. D. Kirkham, Saltcoats, Sask., and W. D. Lang, Cawston, B.C., were made honorary life members of the Canadian Seed Growers' Association, in convention at Edmonton. Further honor was conferred when the two groups were made "Robertson associates" of the organization, a distinction commemorative of Jas. W. Robertson, former Dominion agricultural commissioner.

Mr. Lang has been active in the association for 18 years and Mr. Kirkham for 20 years, during which time the latter has done important work in the purification of Marquis wheat. Bronze medals will be presented later.

May Pets Get On Train

New Rating For Passengers Using Sleeping Car Drawing Rooms Or Compartments

Animal lovers may take their pets with them, and not leave them at home or crate them when travelling on trains, it was learned.

The Canadian National Railways, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. They must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

Had To Think Quickly

A barrister who was sometimes forgetful, having been engaged to plead the cause of an offender, began by saying: "I know the prisoner at the bar, and he bears the character of being a most consummate and rampant scoundrel."

Here somebody whispered to him that the prisoner was his client, whereupon he continued: "That great and good man ever lived who was not calculated by many of his contemporaries?"

The song sparrow has about 2,500 feathers.

WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regain

Nature gives to Canada in magnificent abundance the natural Mineral Salts found in Little Manistowish. These health-giving Salts are recovered and purified by the SASKASAL process, the form of SASKASAL SALTS.

Thus SASKASAL, in turn gives to Canadians in simple form—easy and pleasant to take—the cleaning, purifying, refreshing, and invigorating properties of the natural Mineral Salts in regaining your lost health and maintaining it in joyous vigour. If you suffer from Constipation, Throat, Rheumatism, Gout, or Liver troubles, take SASKASAL Salts. At all Drug Stores—65c. 95

TOWN & COUNTRY
Personalography

The Misses Sossie and Sara MacDonald, who have been the guests of Mr. and Mrs. Chas. Smith, left last Wednesday for their home at Stettin, Alta.

Mrs. R. J. Fairbairn of Calgary was a Carbon visitor last week end.

The C.O.I.T. senior girls motored to Drumheller last Friday and held a picnic at the river.

Mrs. Jas Ramsay, Bruce and Malcol, and Miss Kathleen Watkins are holidaying at Waterton Lakes.

Miss Myrtle Oliphant is visiting at the McCrever home at Cremona.

Mr. and Mrs. Clayton Hay and son, Billie, arrived on Sunday and are holidaying in Carbon.

Rev. J. R. Davies will conduct the Holy Communion service at the Anglican church, Carbon, on Sunday, July 14th, at 11:00 a.m.

Mr. and Mrs. Gottfried and son motored to Calgary on Wednesday.

There will be no show at the Carbon Theatre tonight. The show boys are taking a holiday and are attending the Calgary Stampede.

THE MOST IMPORTANT THING

Events in Ottawa are getting the headlines, but about the most important thing that has happened in Western Canada is the news that the drought of the last five years has been definitely broken. May rains—some districts even in April, and the June rains have broken up the longest drought in the memory of most people living in the west.

NATIONAL PARKS CAMPING RIGHTS CLEARLY REVEALED

There will be no confusion this year regarding camping privileges in the national parks; the regulation is now printed on the backs of motor licenses issued at the parks' gates.

The entrance license fee has for some years entitled motorists to 20 days camping privileges. Trouble arose in that motorists construed that to mean a full three days of camping even though composed of several small periods, during two or more months. The regulation is that the complete permit expires in 30 days from the issuance of the entry license, and, although the license is good for the season as far as the car is concerned, yet, at the expiry of the 30 days another camping permit must be obtained at the rate of one dollar. It is also good for 30 days.

CHRIST CHURCH, CARBON

Services will be held as follows:

1st and 3rd Sundays in month, 11 a.m.

2nd and 4th Sundays in month, 7:30 a.m.

5th Sunday in month by arrangement.

REV. S. EVANS, in charge

TAXATION OF MOTORISTS

Alberta motorists contributed \$22.50 out of every \$100 cash receipts collected by the province in 1931, an increase of 22.50 over the previous year of this amount \$11.40 out of every \$100 represented gasoline tax, while the balance represented registration and license fees.

Comparisons in the provincial financial statements of the last few years show that out of every \$100 received by the provincial treasury, motorists paid the following—1935, gas tax \$11.50, license and registrations \$12.50, total \$24.00; 1934, in the same order, \$12.50 \$10.50, total \$23.00; 1933, \$12.50 \$10.50, total \$23.00.

The tax is seen to be taking more interest in the affairs of the country and are demanding certain changes, chief among them being a lowering of tariffs, which will benefit the majority of Canadian citizens both in the east and west, and not as it now does, the manufacturing class.

MR. HEPBURN COMES THROUGH

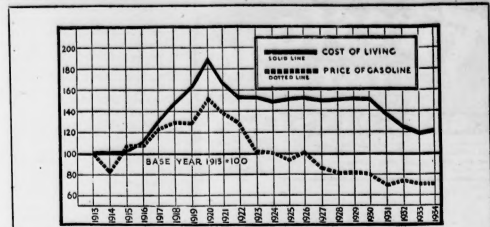

The subject of these lines may not seem directly to have much to do with the actual business of mining, unless the reader is willing to draw the long line and state that anything having to do with the economies of the over-represented province of Ontario must be considered to have a great deal to do with the mines and mining.

Ontario has just completed the first clean-cut bond-sale transaction ever consummated in Canada without the assistance of the recognized bond-dealers. When the bonds were offered and in fact, not one bond house put in a bid for Premier Hepburn's issue. As Alibi it has been stated that the

H. A. CRAIG,
Deputy Minister and
Superintendent of Schools

HON. P. S. HURDALL

Minister of Agriculture

The cost of living, which reached its peak in 1920, has declined; but on the 1913 basis it is still much higher than the price of gasoline. In 1934 the cost of living was 60.7 per cent higher but the price of gasoline was 28.4 per cent lower than in 1913. The data for this graph is based on figures published by the Dominion Bureau of Statistics.

LIVING COSTS MORE BUT GASOLINE COSTS LESS

THE cost of living in Canada in 1934 was approximately 21 per cent. higher and the price of gasoline 28 per cent. lower than in 1913. The price of gasoline never rose to as high a peak as did the cost of living. Since 1920 gasoline prices have declined almost continuously to the present low level.

Imperial Oil has always sought for economical ways of doing business and has always passed on to the consumer the benefits of such economies. Imperial Oil operates on a very small profit and in 1934 earned an average of slightly more than one-half of one cent per gallon on gasoline.

Not only is gasoline cheaper than ever—it is better than ever. Imperial Oil research laboratories played a leading part in developing fuels for modern motors. Imperial gasoline of 1935 is a far better gasoline than that of 1913 yet it sells at a price considerably lower.

STEVEN'S PARTY WILL SPELL RUIN FOR GOVERNMENT

With the announcement by Hon. H. H. Stevens that he will lead a new party in the coming federal election comes the most feared blow to Premier Bennett and his government. For some months past Mr. Stevens has not seen eye to eye with his former colleagues and he has many followers, particularly in the labor classes in his respect.

Mr. Stevens has announced that his new party will contest every seat in the Dominion, and that his policy will be one of reform.

Since the New Brunswick slide into a Liberal government, and with every province in Canada during the past two years joining Liberal; added to this the split that will be caused by the launching of the new party, prospects are not bright for Mr. Bennett's government at the coming polls. There is no doubt that the trend is towards Liberalism, and Mr. Stevens' reforms, it is said, will bring these outlined by the Liberal Party of Canada.

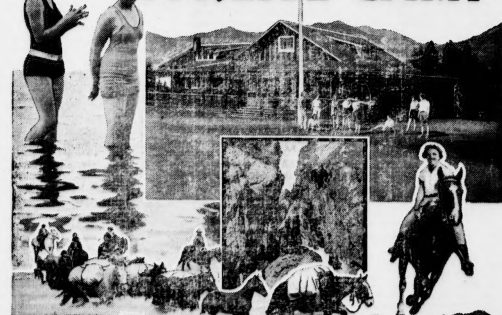

The result seems to be taking more interest in the affairs of the country and are demanding certain changes, chief among them being a lowering of tariffs, which will benefit the majority of Canadian citizens both in the east and west, and not as it now does, the manufacturing class.

bond men withheld from bidding because they were convinced that the public would not buy Ontario bonds on the heels of the government's action in passing legislation providing for the abrogation of contracts for government purchase through Hydro of vast supplies of currently unusable

power from the adjoining province of Quebec.

That story quickly fell to the ground as the public came forward in squadrons and battalions to send the \$20,000,000 loan across in rapid order by buying direct from the Treasury. Actually there is evidence to support the statement that the object of the

bond men was to discipline the Government for its attitude to the Quebec power contracts and prove that not even Governments are greater than Big Money. If he never does anything else Prime Minister Bennett has proved that Governments are not necessarily the tools of the Investment Bankers—Mining Reporter.

WINDERMERE
A REAL CAMP

Striking while the iron is hot West that has gained the admiration of the rest of Canada, and reached 27 main mountain highways. The Famous Banff-Windermere road lead to it, a good alternative route being through the mountains from Cranbrook. The lake averages about 68 degrees in the summer and is ideal for swimming and boating. Excellent trout fishing can be had in several creeks and smaller lakes near by and the lake itself has handicked salmon of considerable size. Within a day's ride on the celebrated Lake of the Headwaters, with six spectacular glaciers all concentrating in one morning with an ice wall several hundred feet high which drops a continual succession of small icebergs into the lake.

The camp is a particularly good centre for a whole summer's rest and exploration, because many are the side trips that can be made by car, mountain-bred ponies, or on foot to adjacent spots of beauty or historic interest. Tennis courts and motor launches are available for the use of the guests.

There is accommodation for 42 guests in the camp, which consists of a large main building, with wide veranda, and of separate small bungalows, equipped with single beds, stove, china closet, nice furniture, running water, and electric lights. A double bath-house, with hot and cold running water, contains separate bath rooms.

Alberta
SCHOOLS OF AGRICULTURE
OLDS and VERMILION

1935-36 Term Opens October 22

Established 21 years ago, these schools have provided free tuition in Agriculture and Home Economics to more than 8,000 farm boys and girls. No entry fee or entry examination is required. Age requirement is 14 years and over. Academic requirement none available to undertake and profit from the courses. Room and board provided in modern dormitories at reasonable rates. Term is five months.
